

SecValid AI 2.0: The Future of Auditing

13 categories of hybrid intelligence.

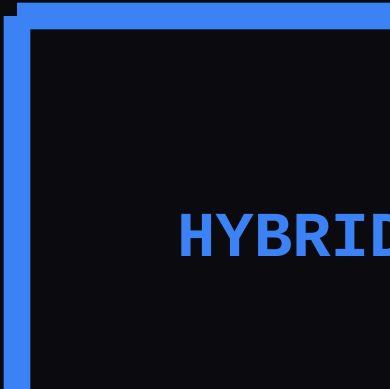

Static Analysis (Regex) + Generative AI (Gemini).

Unprecedented depth in automated security scanning.

Beyond the Basics: Business Logic Sec

Detecting flaws that patterns miss.

- Client-side validation bypasses
- UI state tampering & param manipulation
- Phishing markers & Dark Patterns

HYBRID ENGINE

Regex Speed meets AI Intuition

The best of both worlds.

Deterministic checks for keys and headers.

Probabilistic logic for injection and workflows.

100% Comprehensive Coverage.

REMEDIATION

The 'Fix' Button: AI Code Remediation

Zero-effort vulnerability patching.

Every scan doesn't just find a bug—it fixes it.
Get production-ready fix snippets instantly.

RELIABILITY

3-Tier AI Reliability Strategy

Scanner uptime is guaranteed.

Dynamic fallback between Gemini Flash, Pro, and Static Recovery layers. 99.9% Audit Uptime.

Compliance That Actually Understands

GDPR, HIPAA, and PCI-DSS logic.

We don't just find links; we analyze
UI ethics.

Automated deceptive consent
detection.

The Silent Shield: Infra Hygiene

Server-side posture verification.

Automatic probes for robots.txt and ads.txt.

Real-time audit of CSP and HSTS headers.

Actionable Insights & Scoring

Security isn't a wall of text.

Weighted risk scoring (IDOR, SQLi, SSRF).

Premium Glassmorphic Report UI.

DEVELOPER FIRST

Why Experts Choose SecValid AI?

Zero Configuration Security.

- Hybrid Accuracy + AI Remediations
- Privacy-First Secure Routing
- Production-ready audit history
